Contents		
The module provides an overview of the history of pedagogical thinking: How did the concept of education develop? What were the influencing factors, which horizons gave and give orientation to pedagogical thinking and why is it important to reflect on the historical background? Central trends and stages in the history of theory and ideas, social and real history as well as the institutional history of pedagogy are addressed.		
Intended learning outcomes		
The students have got knowledge about the historical context of education. They are able to deduce educational terms and different theories and practice models of education historically, embed them socioculturally and understand connections to current sociopolitical debates. They understand basic questions of the subject, as the aspects of norms, actions, culture and epistemology and are able to explain these. In doing so, they understand the role and relevance of historical pedagogy.
