<p>Within this module, students have to scientifically examine a question or problem which they have decided on in small groups. The work offers not only theoretical access but practical references as well. Thereby, the independent conception, execution and evaluation of the project as well as the documentation of the project's progress and the essential work results are central.</p>		
Intended learning outcomes		
<p>The students are able to analyze, reason, independently work on, document and present educational topics. They understand evaluation and assessment standards in order to plan, independently execute, reflect and evaluate educational projects.</p>
