<b>Contents</b>		
The module focuses on future-oriented topics in educational practice research, with an emphasis on artificial intelligence. Students conduct their own empirical studies in educational practice settings, analyze technological developments, and reflect on their methodological implications for educational research.		
<b>Intended learning outcomes</b>		
Students acquire in-depth knowledge of current future-oriented topics in educational practice research, particularly in the field of artificial intelligence. They are able to critically analyze technological developments, systematically design, conduct, and evaluate their own empirical studies in educational practice settings, and reflect on the results with a solid foundation in educational theory and research methodology.
