<b>Contents</b>		
<p>This module covers the role of media in the education and development of children, adolescents and adults. Using current research from developmental psychology, educational psychology, media psychology and related fields, we will discuss, for example, how different media are used for formal and informal learning processes, how they can be designed to enhance learning processes, how media influence cognitive, emotional and social development across the lifespan, and how media literacy can be developed or trained. The module focuses on developmental psychological aspects of media use, media effects and media competence.</p>		
<b>Intended learning outcomes</b>		
<p>Students will learn about the role of media in learning, education and development processes and will be able to assess and evaluate these issues based on relevant research. They are able to critically reflect on relevant research and to apply the acquired knowledge in practical fields.</p>
