Contents		
<p>The module addresses the social-psychological foundation of human behavior and its relevance for social interaction and cooperation. In addition, based on current research findings from the scientific literature, decision making at work is discussed with potential applications in career counseling (e.g. choosing an occupation or company to work for) or consumer behavior in practice. Insights are given into and examples of career counseling approaches are practiced.</p>		
Intended learning outcomes		
<p>Students reach deepened theoretical and methodological competencies in relation to decision-making and social interaction. Also, the ability to read and understand scientific publications, to evaluate the methods and results, and to infer and communicate implications for applied problems. This knowledge and skills can be used and applied in the run of the later study program, in particular with regard to the Bachelor thesis and in a follow-up Master program. Given the cross- and interdisciplinary character of the module, the skill to integrate different theoretical perspectives will be enhanced. In addition, students gain central skills for their later occupation, in terms of preparing them for a potential academic career or that can be used in practice after finishing the Bachelor, e.g., with regard to career counseling or coaching for decision-making at work.</p>
