holder of the Professorship of Experimental Clinical Psychology, holder of the Professorship of Clinical Psychology, Biological Psychology and Psychotherapy		Institute of Psychology
<b>ECTS</b>	<b>Method of grading</b>	<b>Only after succ. compl. of module(s)</b>
5	(not) successfully completed	--
<b>Duration</b>	<b>Module level</b>	<b>Other prerequisites</b>
1 semester	undergraduate	--
<b>Contents</b>		
<p>The aim of this module is to deepen the knowledge in biopsychology and cognitive and affective neuroscience by focusing on the findings and research methods of specific areas within the field. Potential topics include perception and attention, consciousness, learning and memory, emotion and motivation, social behavior and brain lateralization. In addition to focusing on non-invasive research methods such as EEG, peripheral physiology or neuroimaging, this module will also introduce invasive pharmacological methods and neurostimulation as well as genetic approaches.</p>
