

Module title		Abbreviation
Psychological Diagnostics 2		o6-PSY-DTT-2-152-mo1
Module coordinator		Module offered by
holder of the Professorship of Differential Psychology		Institute of Psychology
ECTS	Method of grading	Only after succ. compl. of module(s)
6	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	undergraduate	--
Contents		
<p>In this module, the students acquire advanced knowledge of central topics of diagnostic Psychology in view of various application fields. They familiarise themselves with various diagnostic methods whilst especially focusing on multi-modal diagnostics, which combine various test methods. In addition, the students examine topics such as the assembly of test batteries, aggregation and weighting of individual test methods, statistical vs. clinical assessment, types of questions, conversation techniques, judgement formation as well as diagnostic principles. They compare scientific standards to practical requirements. Additional topics include the interpretation of psychological test results, giving feedback to test persons, decision making, deduction of intervention measures, evaluation and processing of information in diagnostic processes. Furthermore, the students acquire skills in applying diagnostic means (e.g. administering performance tests, conducting diagnostic interviews, behavioural observation or similar) in practical classes.</p>		
Intended learning outcomes		
<p>Advanced competencies in raising and recording psychodiagnostic findings about individuals based on observation, questioning, tests and questionnaires. Practice in planning and conducting psychodiagnostic data collection. Knowledge of diagnostic tools of different areas of Psychology as well as self-experience in carrying out and evaluating diagnostic procedures.</p>
