Contents
The module deals with fundamental theories and phenomena of age-related changes and consistencies regarding behavior, experiences, learning and performance across the life span. Furthermore, students get to know the essential research methods and empirical findings of the field.

The lecture introduces the subject area and outlines theories and methods. During the seminars, a variety of topics, all relevant to the exam, are dealt with in-depth, for instance by discussing and reflecting topics and their relevance in the professional context in small-group settings.

Intended learning outcomes
Student acquire specialist knowledge about pivotal subject areas, theories and methods of the field of Developmental Psychology. They will acquire the necessary knowledge and skills to consider findings from research and relevant theories when dealing with applied psychological problems as well in the context of their own actions. Furthermore, students acquire skills relevant for giving (scientific) oral presentations and writing scientific reports.
