Contents		
In this module, the students acquire basic knowledge of central subject areas, theories and findings of Developmental Psychology. Part A and B of the lecture provide an overview of the principles of cognitive, social, emotional and motivational human development across the lifespan. The seminar elaborates on selected, alternating subject areas (e.g. early childhood, cognitive development, Evolutionary Developmental Psychology).		
Intended learning outcomes		
The students acquire professional and practical skills, which are useful for the further course of studies and for their future occupation. These skills include basic knowledge of theories, methods and findings of Developmental Psychology as well as basic knowledge of applicabilities resulting from Developmental Psychology. Furthermore, the competencies acquired facilitate the introduction to focus areas of the Master's degree programme and can be applied in professional life in various ways.
