## Module title
Decisions in a social context

## Abbreviation
06-PSY-EisK-092-m01

## Module coordinator
holder of the Chair of Social Psychology

## Module offered by
Institute of Psychology

## ECTS
9

## Method of grading
numerical grade

## Duration
1 semester

## Module level
undergraduate

## Other prerequisites
Registration for assessment: Yes, as specified.

### Contents
This module deals with the cognitive and emotional principles of human decision making and their interactions during judgement formation. Furthermore, it examines human decision making in an economic context, for example during processes of applicant selection or investment decisions at the stock exchange.

### Intended learning outcomes
The students acquire profound, theoretical professional skills as well as comprehensive methodological competencies in the subdiscipline of human decision making. They apply their advanced professional knowledge during the further course of studies, especially during the writing of their Bachelor’s thesis and during the Master’s degree programme. The interdisciplinarity of the module promotes the students’ abilities to integrate different theoretical perspectives and approaches. In addition, the students acquire special professional competencies, which equip them for an academic career and which can already be useful in professional life after finishing the first university degree programme (BSc.), for example for optimising processes of decision making in work life.

### Courses
S + S (no information on SWS (weekly contact hours) and course language available)

### Method of assessment
written examination (90 minutes) and presentation (approx. 20 minutes)

### Allocation of places
Number of places: maximum 25

### Additional information
--

### Referred to in LPO I
(examination regulations for teaching-degree programmes)
