<b>Contents</b>		
This module deals with selected, alternating contents from the fields of development and life-long learning. The thematic priorities include cognitive and social development, developmental disorders and media.		
<b>Intended learning outcomes</b>		
The students acquire profound, theoretical professional skills as well as comprehensive methodological competencies in the subdiscipline of cognitive and social development and learning processes. They apply their advanced professional knowledge during the further course of studies, especially during the writing of their Bachelor's thesis and during the Master's degree programme. In addition, the students acquire special professional competencies which are already useful in professional life after the first university degree (BSc.), for example when it comes to counselling activities in the school and health care system.
