### Contents
The lecture deals with fundamental aspects of psychological interventions (history, scientific foundation, evaluation criteria, research methods, diagnostics, indication). The basics of evidence-based psychotherapy are taught and will be deepened during the seminar. Further developments of the respective psychotherapies will be discussed.

### Intended learning outcomes
Students have the opportunity to gain a broad knowledge of evidence-based therapeutic interventions in the lecture. The seminar conveys newer developments and individual intervention modules so that basic and in-depth knowledge of intervention psychology can be available at the end of the module. In order to achieve this goal, it is necessary to attend the respective lecture/seminar and to study the accompanying literature.

### Courses
(type, number of weekly contact hours, language — if other than German)

V (2) + S (2)

### Method of assessment
(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

written examination (approx. 90 minutes)
Language of assessment: German and/or English
Creditable for bonus
