Experimental Economic Psychology 2		o6-PSY-MA-EW-2-152-m01
Module coordinator		Module offered by
holder of the Professorship of Industrial and Organisational Psychology		Institute of Psychology
ECTS	Method of grading	Only after succ. compl. of module(s)
10	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
In this module, the students work on a pre-defined empirical research project from the subject area of Industrial and Organisational Psychology under the guidance of a supervisor.		
Intended learning outcomes		
The students learn to deduce a question from research literature and to translate this question into an empirical research design. They advance their skills in evaluating and properly interpreting empirical data. Furthermore, they focus on the practical application of the results (e.g. developing interventions for organisations). The module prepares the students for the independent realisation of research projects, for example for their Master's thesis.		
Courses (type, number of weekly contact hours, language — if other than German)		
R (4)		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
<p>a) presentation (approx. 30 minutes) or b) written examination (approx. 60 minutes) or c) oral examination (approx. 15 minutes) or d) practical assignment (approx. 60 hours) or e) term paper (approx. 10 pages) or f) exposé (approx. 5 pages) or g) scientific poster (1 page DIN A0) or h) project report (approx. 10 pages) or i) case report (approx. 5 pages) or j) exercises in the form of questions to be answered during the seminar (approx. 0.5 pages per session)</p> <p>An exposé is to outline the theoretical background, the research topic, the hypotheses and the method (independent and dependent variables, measuring methods, experimental design and procedure, subjects as well as intended statistical analysis) of a projected empirical study. A case report describes a disorder using the example of a (fictitious) patient; it includes a symptom report, a medical history, a behavioural assessment, a diagnosis and a treatment plan derived from this.</p> <p>Language of assessment: German and/or English creditable for bonus</p>
