Module offered by | Faculty of Medicine

ECTS | Method of grading | Only after succ. compl. of module(s)
5 | numerical grade | 06-PSY-MA-FOR-1

Duration | Module level | Other prerequisites
1 semester | graduate | --

Contents
The interdisciplinary lecture provides an introduction to Forensic Psychiatry. The students acquire basic theoretical knowledge in view of psychiatry, forensics, psychology and development dynamics and consolidate their knowledge on the basis of individual cases which yet have to be assessed or are of special clinical interest. The courses provide an overview of manifestations, development and treatment of mental disorders such as schizophrenia, addictive disorders, sexual disorders, personality disorders etc. while at the same time discussing relevant legal problems in the context of mental disorders. Therefore, the courses deal with aspects of guardianship and social law, different forms of delinquency (e.g.: property offences, homicide and sex offences) as well as questions of making prognoses, credibility, protection of victims and youth and adult crime prevention.

Intended learning outcomes
No information on intended learning outcomes available.
