

holder of the Chair of Psychology V - Differential Psycholo- gy, Personality Psychology, and Psychological Diagnostics Exts Method of grading Only after succ. compl. of module(s) 5 numerical grade 0 Diration Module level Other prerequisites 1 semester graduate Contents In the seminar 'Project Work Differential Psychology' current research projects are discussed. In addition, the theoretical foundations and objectives of the ongoing research will be presented and the participants theoretically and practically prepared for an active participation in the role as researchers in these projects. In addition, some knowledge for the writing of scientific papers will be deepened and practiced through own scientific papers and contributions. Intended learning outcomes The students learn to examine the current research literature critically and in depth and to use this expertise to develop new research questions. They acquire theoretical and scientific practical knowledge as preparation for an independent handling of a research question in the master thesis. Students design their own empirical research in small groups, carry it out, evaluate it and relate the results to the current state of research. In addition, students learn to communicate the results in science-typical form (lecture, report, poster). Courses (type, number of weekly contact hours, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus) <t< th=""><th colspan="5">Module title</th><th>Abbreviation</th></t<>	Module title					Abbreviation
