

Module title		Abbreviation
Clinical Psychology & Experimental Psychotherapy Research 2		06-PSY-MA-KEP-2-152-m01
Module coordinator		Module offered by
holder of the Professorship of Clinical Psychology, Biological Psychology and Psychotherapy		Institute of Psychology
ECTS	Method of grading	Only after succ. compl. of module(s)
10	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
<p>In project work, the students work in small groups to carry out a study in the field of Clinical Psychology and Experimental Psychopathology. First, they become familiar with theoretical principles and develop an experimental design in seminars and tutorials. Next, they are introduced to independent work and become acquainted with data collection, evaluation and interpretation under the guidance of a supervisor. After discussing the results, the students write individual reports in the form of manuscripts following the guidelines of the DGPs (German Society for Psychology) /APA (American Psychological Association).</p>		
Intended learning outcomes		
No information on intended learning outcomes available.		
Courses (type, number of weekly contact hours, language – if other than German)		
R (4)		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
<p>a) presentation (approx. 30 minutes) or b) written examination (approx. 60 minutes) or c) oral examination (approx. 15 minutes) or d) practical assignment (approx. 60 hours) or e) term paper (approx. 10 pages) or f) exposé (approx. 5 pages) or g) scientific poster (1 page DIN A0) or h) project report (approx. 10 pages) or i) case report (approx. 5 pages) or j) exercises in the form of questions to be answered during the seminar (approx. 0.5 pages per session)</p> <p>An exposé is to outline the theoretical background, the research topic, the hypotheses and the method (independent and dependent variables, measuring methods, experimental design and procedure, subjects as well as intended statistical analysis) of a projected empirical study. A case report describes a disorder using the example of a (fictitious) patient; it includes a symptom report, a medical history, a behavioural assessment, a diagnosis and a treatment plan derived from this.</p> <p>Language of assessment: German and/or English</p> <p>creditable for bonus</p>
