

Module title		Abbreviation
Psychological Methods, Cognition, & Application 1		o6-PSY-MA-MKA-2-152-m01
Module coordinator		Module offered by
holder of the Professorship of Psychological Research Methods		Institute of Psychology
ECTS	Method of grading	Only after succ. compl. of module(s)
10	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
Project works provide the students with insights into the application of theories, findings and methods of Cognitive Psychology to basic and applied questions of Cognitive Psychology (e.g. action control, eye tracking, visual information processing) and to other subject areas.		
Intended learning outcomes		
The students acquire theoretical professional skills as well as methodological competencies in applying Cognitive Psychology research. They apply their advanced subject and methodological knowledge to the preparation of their Master's thesis. In addition, they can acquire special occupational competencies.		
Courses (type, number of weekly contact hours, language – if other than German)		
R (4)		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
a) presentation (approx. 30 minutes) or b) written examination (approx. 60 minutes) or c) oral examination (approx. 15 minutes) or d) practical assignment (approx. 60 hours) or e) term paper (approx. 10 pages) or f) exposé (approx. 5 pages) or g) scientific poster (1 page DIN A0) or h) project report (approx. 10 pages) or i) case report (approx. 5 pages) or j) exercises in the form of questions to be answered during the seminar (approx. 0.5 pages per session) An exposé is to outline the theoretical background, the research topic, the hypotheses and the method (independent and dependent variables, measuring methods, experimental design and procedure, subjects as well as intended statistical analysis) of a projected empirical study. A case report describes a disorder using the example of a (fictitious) patient; it includes a symptom report, a medical history, a behavioural assessment, a diagnosis and a treatment plan derived from this. Language of assessment: German and/or English creditable for bonus
