

<b>Module title</b>		<b>Abbreviation</b>
Psychological Methods, Cognition, & Application 2		o6-PSY-MA-MKA-2-152-m01
<b>Module coordinator</b>		<b>Module offered by</b>
holder of the Professorship of Psychological Research Methods, holder of the Professorship for Research Methods and Social Cognition		Institute of Psychology
<b>ECTS</b>	<b>Method of grading</b>	<b>Only after succ. compl. of module(s)</b>
10	numerical grade	--
<b>Duration</b>	<b>Module level</b>	<b>Other prerequisites</b>
1 semester	graduate	--
<b>Contents</b>		
Students participate in research projects, in which theories, results and methods of cognitive Psychology are applied to basic and applied topics of cognitive research (e.g. action control, eye tracking, visual information processing).		
<b>Intended learning outcomes</b>		
Students get theoretical and methodological competences in application of cognitive research. The enhanced knowledge of scientific content and methods is relevant for preparing a master thesis. Additionally students obtain special competences relevant for professional practice.		
<b>Courses</b> (type, number of weekly contact hours, language – if other than German)		
R (4)		
<b>Method of assessment</b> (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
<p>a) presentation (approx. 30 minutes) or  b) written examination (approx. 60 minutes) or  c) oral examination (approx. 15 minutes) or  d) practical assignment (approx. 60 hours) or  e) term paper (approx. 10 pages) or  f) exposé (approx. 5 pages) or  g) scientific poster (1 page DIN A0) or  h) project report (approx. 10 pages) or  i) case report (approx. 5 pages) or  j) exercises in the form of questions to be answered during the seminar (approx. 0.5 pages per session)</p> <p>An exposé is to outline the theoretical background, the research topic, the hypotheses and the method (independent and dependent variables, measuring methods, experimental design and procedure, subjects as well as intended statistical analysis) of a projected empirical study. A case report describes a disorder using the example of a (fictitious) patient; it includes a symptom report, a medical history, a behavioural assessment, a diagnosis and a treatment plan derived from this.</p> <p>Language of assessment: German and/or English  creditable for bonus</p>
