

Module title		Abbreviation
Social Cognition 2		o6-PSY-MA-SK-2-152-mo1
Module coordinator		Module offered by
holder of the Chair of Social Psychology, holder of the Professorship for Research Methods and Social Cognition		Institute of Psychology
ECTS	Method of grading	Only after succ. compl. of module(s)
10	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
During the project seminar, specific research projects from social psychology and social cognition are developed and carried out under supervision. As a rule, this includes the development of an empirical research design, data collection and analysis, as well as the presentation of results.		
Intended learning outcomes		
The project imparts knowledge and skills that are required to carry out empirical research. This includes the operationalization of theoretical research designs, the coordination and implementation of data collection (including ethical aspects, aspects of data protection and open science), the evaluation of the collected data and their preparation for scientific communication.		
Courses (type, number of weekly contact hours, language — if other than German)		
R (4)		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
a) presentation (approx. 30 minutes) or b) written examination (approx. 60 minutes) or c) oral examination (approx. 15 minutes) or d) practical assignment (approx. 60 hours) or e) term paper (approx. 10 pages) or f) exposé (approx. 5 pages) or g) scientific poster (1 page DIN A0) or h) project report (approx. 10 pages) or i) case report (approx. 5 pages) or j) exercises in the form of questions to be answered during the seminar (approx. 0.5 pages per session) An exposé is to outline the theoretical background, the research topic, the hypotheses and the method (independent and dependent variables, measuring methods, experimental design and procedure, subjects as well as intended statistical analysis) of a projected empirical study. A case report describes a disorder using the example of a (fictitious) patient; it includes a symptom report, a medical history, a behavioural assessment, a diagnosis and a treatment plan derived from this. Language of assessment: German and/or English creditable for bonus
