Contents		
During the project seminar, specific research projects from social psychology and social cognition are developed and carried out under supervision. As a rule, this includes the development of an empirical research design, data collection and analysis, as well as the presentation of results.		
Intended learning outcomes		
The project imparts knowledge and skills that are required to carry out empirical research. This includes the operationalization of theoretical research designs, the coordination and implementation of data collection (including ethical aspects, aspects of data protection and open science), the evaluation of the collected data and their preparation for scientific communication.
