Analysis & Regulation of Behavior 1			06-PSY-MA-VV-1-152-m01
Module coordinator		**Module offered by**	
holder of the Professorship of Intervention Psychology		Institute of Psychology	
ECTS	**Method of grading**	**Only after succ. compl. of module(s)**	
5	numerical grade	--	
Duration	**Module level**	**Other prerequisites**	
1 semester	graduate	--	

Contents

The seminar on project work either elaborates on and presents the topics from project work or examines a topic especially relevant to Clinical Psychology. The students prepare for every session by reading corresponding literature which is subsequently discussed and examined in the group.

Intended learning outcomes

Provided that the students participate on a regular basis, the seminar offers an opportunity to thoroughly study the contents of the project work or to acquire detailed knowledge of a specific clinical topic of Intervention Psychology. This also includes the critical examination of scientific publications. The students learn to apply different techniques of reviewing and teaching individual topics. They won't be able to acquire these competencies if they only attend the seminar on the day of their own presentation.

Courses (type, number of weekly contact hours, language — if other than German)

S (2)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

a) presentation (approx. 30 minutes) or
b) written examination (approx. 60 minutes) or
c) oral examination (approx. 15 minutes) or
d) practical assignment (approx. 60 hours) or
e) term paper (approx. 10 pages) or
f) exposé (approx. 5 pages) or
g) scientific poster (1 page DIN A0) or
h) project report (approx. 10 pages) or
i) case report (approx. 5 pages) or
j) exercises in the form of questions to be answered during the seminar (approx. 0.5 pages per session)
An exposé is to outline the theoretical background, the research topic, the hypotheses and the method (independent and dependent variables, measuring methods, experimental design and procedure, subjects as well as intended statistical analysis) of a projected empirical study. A case report describes a disorder using the example of a (fictitious) patient; it includes a symptom report, a medical history, a behavioural assessment, a diagnosis and a treatment plan derived from this.
Language of assessment: German and/or English

Allocation of places

max. 12 places. Should the number of applications exceed the number of available places, places will be allocated as follows: Applicants who have not yet achieved any of the required ECTS credits in the respective sub-area of mandatory electives will be given preferential consideration. The remaining places, if and when any become available, will be allocated to applicants who already have achieved ECTS credits. Within these groups, places will be allocated according to the number of subject semesters. Among applicants with the same number of subject semesters, places will be allocated by lot. Should there be, within one subject, several modules with a restricted number of places, the result of the selection process for one module will also apply to all other modules.
