5	(not) successfully completed	--

Duration	Module level	Other prerequisites
1 semester	graduate	--

Contents

Students will be involved in the diagnosis and treatment of patients through the application of scientifically validated and recognized psychotherapeutic procedures and methods by performing the services specified in §18(2) PsychThApprO:
1. based on scientifically sound knowledge of psychological functions, disorders, and diagnostic principles, conduct case histories and psychodiagnostic assessments using scientifically validated methods with at least ten patients from various age and patient groups, covering at least four different disorder categories with varying degrees of severity and impairment, including at minimum the following services:
a) four initial interviews,
b) four case histories, which must be documented in writing by the students and may be recorded on video,
c) four scientifically validated psychodiagnostic assessments,
d) four determinations of indication or risk and prognosis assessments including evaluation of suicidality, and
e) four patient briefings on diagnostic and classification findings,
2. participate in at least one outpatient psychotherapeutic treatment involving at least twelve consecutive treatment sessions, which combines clinical-practical aspects with their respective scientific foundations, and during which diagnostic and therapeutic procedures are practiced,
3. participate in at least two additional individual psychotherapeutic treatments involving a total of at least twelve treatment sessions, each with a different indication, with at least one patient being a child or adolescent, and take responsibility for the diagnostics, case history, and therapy planning, as well as carry out interim and final evaluations,
4. independently, but under supervision, carry out at least three different basic psychotherapeutic interventions, such as relaxation techniques, psychoeducation, or informational discussions with relatives,
5. conduct and document conversations with significant reference persons in at least four patient treatments,
6. participate in at least twelve group psychotherapeutic sessions,
7. independently and under personal responsibility, prepare at least one comprehensive psychological-psychotherapeutic expert report, which may only be used for training purposes, and
8. participate in in-house training sessions.

Intended learning outcomes

In the outpatient clinic for psychotherapy within the institution, students are enabled to apply the knowledge they have acquired in real treatment settings and in contact with patients. During their studies, students will be involved by psychotherapists in outpatient care using scientifically tested and evidence based psychotherapeutic procedures and methods participate in the diagnosis and treatment of patients.

Courses (type, number of weekly contact hours, language — if other than German)

S (2)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

report on work placement (approx. 15 pages)
Language of assessment: German

Allocation of places

--

Additional information
Compulsory attendance in accordance with Section 5 (2) in conjunction with Annex 2 PsychThApprO Proof of attendance time to be provided in accordance with Section 18 (2) PsychThApprO: at least 150 hours via university outpatient clinic As a rule, supervision by a licensed psychotherapist must be ensured; upon application to the examination board, a deviation from this rule is possible if equivalent supervision is ensured.
