

Module title		Abbreviation
Planning, implementation and evaluation of scientific studies in the field of psychotherapy		o6-PSY-MAKLIN-fPrakT-1-222-m01
Module coordinator		Module offered by
holder of the Professorship of Biological Psychology, Clinical Psychology, and Psychotherapy; holder of the Professorship of Psychological Intervention; holder of the Professorship of Experimental Clinical Psychology; holder of the Professorship of Differential Psychology, Personality Psychology, and Psychological Diagnostics		Institute of Psychology
ECTS	Method of grading	Only after succ. compl. of module(s)
5	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
<p>The internship psychotherapy research serves to acquire in-depth practical experience in the research of psychological, psychosomatic and/or neuropsychological disorders, their associated neurobiological processes, and their psychotherapeutic treatment. The students learn how to implement essential quality criteria of scientific studies in a psychotherapeutic context when planning, implementing, evaluating and presenting scientific studies. These experiences are to be taken into account for designing an own scientific study. This in turn serves to promote psychotherapeutic skills from participating study therapists and contributes to the quality assurance of the therapist's behavior in therapy studies.</p> <p>The internship includes the independent observation of human experience and behavior, human development including social influences and biological components. In addition, the process of considering research results in patient-specific care and for care innovation is taught.</p>		
Intended learning outcomes		
Students will be empowered to carry out their own scientific study in small groups under expert guidance. They actively plan and implement the study, acquire data and present the results in a scientific context. These goals can only be achieved by regular attendance, active participation and active lecture work.		
Courses (type, number of weekly contact hours, language – if other than German)		
R (4) Module taught in: German and/or English		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
a) scientific poster (1 page DIN A0) or b) project report (approx. 10 pages) Language of assessment: German and/or English		
Allocation of places		
--		
Additional information		
Compulsory attendance in accordance with § 5 (2) in conjunction with Annex 2 PsychThApprO In accordance with § 17 (2) in conjunction with (5) PsychThApprO, at least 5 ECTS for active participation in exemplary and/or planning and conducting your own scientific research. According to § 17 (4) PsychThApprO under supervision in small groups, in blocks/accompanying studies.		
Workload		
150 h
