Contents		
<p>The module presents basic knowledge of central psychological theories and research findings in the field of motivation, volition, and emotion. Aim is the analysis, prediction and explanation of motivational and emotional influences on behavior, goal-oriented actions, and decisions. The module covers historical theories (drive theory, field theory), modern expectancy-value approaches, theories of basal motives, goals and self-concept, self-regulation and goal pursuit (volition). From emotion psychology, evolutionary, cognitive and constructivist theories and central findings will be discussed. In the associated seminars, we will discuss selected topics and applications of motivation and emotion psychology.</p>		
Intended learning outcomes		
<p>Students acquire professional and practical skills that can be used in further studies as well as at work. They learn basic theories and methods of emotion and motivation psychology, and how to use these concepts and skills for the enhancement of motivation and well-being in applied settings (e.g., work, education, psychotherapy).</p>
