Contents		
<p>In this module, the students acquire basic knowledge of the methods of knowledge acquisition of an empirical discipline. The lecture includes scientific-theoretical and philosophical principles of concept formation and theory construction, measurement theory, induction and deduction as well as research paradigms and epistemological and practical aspects of data collection. The practical part deals with the application in research practice.</p>		
Intended learning outcomes		
<p>The students become acquainted with the theoretical principles of scientific modelling in an empirical discipline and acquire competencies in selecting an empirical method of data collection appropriate to the research subject and in correctly interpreting the results - also in view of their limits. This knowledge and skills enable the students to critically examine scientific literature.</p>
