### Module title
Psychological Research Methods

### Abbreviation
06-PSY-ML-092-m01

### Module coordinator
holder of the Professorship of Psychological Research Methods

### Module offered by
Institute of Psychology

### ECTS
7

### Method of grading
numerical grade

### Only after succ. compl. of module(s)
--

### Duration
1 semester

### Module level
undergraduate

### Other prerequisites
--

#### Contents
In this module, the students acquire basic knowledge of the methods of knowledge acquisition of an empirical discipline. The lecture includes scientific-theoretical and philosophical principles of concept formation and theory construction, measurement theory, induction and deduction as well as research paradigms and epistemological and practical aspects of data collection. The practical part deals with the application in research practice.

#### Intended learning outcomes
The students become acquainted with the theoretical principles of scientific modelling in an empirical discipline and acquire competencies in selecting an empirical method of data collection appropriate to the research subject and in correctly interpreting the results - also in view of their limits. This knowledge and skills enable the students to critically examine scientific literature.

#### Courses
V + V + Ü (no information on SWS (weekly contact hours) and course language available)

#### Method of assessment
written examination (120 minutes) and term paper (approx. 10 pages), weighted 1:1

#### Allocation of places
--

#### Additional information
--

#### Referred to in LPO I
(examination regulations for teaching-degree programmes)
