Contents		
This module elaborates on the principles of ergonomics (e.g. organisation of the work environment and working conditions, personnel selection and training) on the basis of examples (e.g. from Traffic Psychology)..		
Intended learning outcomes		
The students acquire profound, theoretical professional skills as well as comprehensive methodological competencies in the subdiscipline of ergonomics. They apply their advanced professional knowledge during the further course of studies, especially during the writing of their Bachelor's thesis and during the Master's degree programme. In addition, the students acquire special professional competencies, which can already be useful in professional life after the first university degree programme (BSc.), for example when it comes to the ergonomic organisation of modern work environments and human-computer interactions.
