Contents		
<p>This module provides basic knowledge about research methods, theories, and results on psychological processes underlying social interaction. The lecture covers fundamental research in social psychology as well as applied aspects. Central topics are person perception, stereotypes and prejudice, social influence, the self in a social context, attraction, close relationships, group interaction, as well as conflict and cooperation. The seminar will provide deeper insights into the topics of the lecture, their experimental and theoretical underpinnings as well as their implications for application.</p>		
Intended learning outcomes		
<p>Students know basic research methods, theories and results of social psychology. They will know about the relevance of this knowledge for understanding and solving applied problems (e.g., in organisational psychology or clinical psychology). Students will also acquire abilities to evaluate and compare the quality of scientific results, methods, and theories.</p>
