<b>Contents</b>		
In this module, the students acquire basic knowledge of the principles of experience and behaviour in the economic environment. The two-part lecture comprises the subject areas, basic theories, methods, application and practice of Industrial and Organisational Psychology.		
<b>Intended learning outcomes</b>		
The students acquire professional and practical skills, which are useful for the further course of studies and their future occupation. They gain profound professional knowledge of central results, theories and methods of Industrial and Organisational Psychology and learn to apply this knowledge to practice as well as to the Master's degree programme. After finishing the first university degree programme (BSc.), the students have already acquired theoretical, empirical and application-oriented competencies, which can be useful in everyday life and in professional life (e.g. personnel selection and management).
