Contents		
<p>This seminar imparts know-how about the evaluation of open source solutions. Afterwards, it discusses the functionality of established products of this area. During their presentations, the students introduce evaluation criteria as well as functional aspects of a specific product and show how to productively work with it.</p>		
Intended learning outcomes		
<p>The students have detailed knowledge of the evaluation of open source software. They know farther-reaching functions for productive working with open source applications. The students are able to compare open source solutions to their commercial counterparts.</p>
