Contents		
Theoretical principles of diagnostics and intervention measures for disorders of phonetic and phonological acquisition, lexical-semantic and morphosyntactic disorders and disorders of language comprehension; disorder-specific therapy and support concepts, deduction of speech therapeutic goals, planning and evaluation of intervention sequences on the basis of exemplary cases.		
Intended learning outcomes		
Self- and social competence: The students are able to examine basic diagnostic and therapeutic patterns of behaviour in the context of a speech therapeutic intervention. The aim is to objectively evaluate own therapeutic behaviour and to critically discuss and reflect within the seminar group.		
Methodological competence: theory-based and evidence based therapy methods for phonetic, phonological, semantic-lexical, morphosyntactic disorder and disorders in language comprehension.		
Subject and professional competence: The students have basic knowledge of diagnostic and therapeutic concepts for phonetic, phonological, semantic-lexical disorders, morphosyntactic and disorders in language comprehension. They know a variety of disorder-specific therapy and support concepts and can assess these concepts on the basis of evaluation studies regarding application fields, strengths and weaknesses.
