<b>Contents</b>		
Theoretical principles of therapeutic concepts for disorders of grammar acquisition and for treating receptive and pragmatic disorders, disorder-specific therapy and support concepts, deduction of speech therapeutic goals, planning and evaluation of therapy sequences on the basis of exemplary cases		
<b>Intended learning outcomes</b>		
Self- and social competence: The students are able to examine basic therapeutic patterns of behaviour in the context of a speech therapeutic intervention. The aim is to objectively evaluate own therapeutic behaviour and to critically discuss and reflect within the seminar group. Methodological competence: The students' knowledge of Speech and Language Pathology enables them to methodically derive goals and plans for interventions for dysgrammatism and receptive/pragmatic language acquisition disorders, to examine the effectiveness and efficiency of these interventions, and to modify and evaluate concepts according to clients and disorders. Furthermore, they are able to employ basic methods of therapy support (modelling technique, types of corrective feedback, contrast filling etc.). Subject and professional competence: The students have basic knowledge of therapeutic concepts for dysgrammatism and receptive and pragmatic language acquisition disorders. They know a variety of disorder-specific therapy and support concepts and can assess these concepts on the basis of evaluation studies regarding application fields, strengths and weaknesses.
