

<b>Module title</b>		<b>Abbreviation</b>
Theory and practice of speech and language disorders: assessment of developmental language disorders		o6-SH-LogDiagSES-142-mo1
<b>Module coordinator</b>		<b>Module offered by</b>
Berufsfachschule für Logopädie Würzburg der Caritas-Schulen gGmbH		Chair of Special Education III: Speech and Language Pathology
<b>ECTS</b>	<b>Method of grading</b>	<b>Only after succ. compl. of module(s)</b>
5	numerical grade	--
<b>Duration</b>	<b>Module level</b>	<b>Other prerequisites</b>
1 semester	undergraduate	Theoretical classes: speech therapy: developmental speech disorders in children. Practical classes: practice of speech therapy: developmental speech disorders in children.
<b>Contents</b>		
Different test methods in the fields of semantics/vocabulary, phonetics/phonology, syntax/morphology. Differential-diagnostic methods for determining the linguistic level of development. Deduction of ICF-oriented therapy goals. Practical exercises for establishing and analysing diagnoses/findings.		
<b>Intended learning outcomes</b>		
Professional competence: The students are able to reasonably select and evaluate test methods according to the corresponding linguistic level. They decide whether therapy is needed based on the diagnostic results and determine therapy priorities by applying their knowledge of chronology of development. Implementation competence: The students are able to employ different test methods in a patient-oriented manner. They are able to evaluate and interpret the diagnostic results whilst taking into account linguistic and extralinguistic areas of development. Social-communicative competence: The students are able to adjust their verbal and non-verbal behaviour to the respective test situation. Personal competence: By taking care of time management and structure, the students are able to take on the role of the therapist during diagnostics. They show appreciation for the patient. Reflection competence: The students evaluate their therapeutic attitude as well as their responses to patients. They reconsider the selection and execution of test methods applied in view of an ICF-oriented therapy planning.		
<b>Courses</b> (type, number of weekly contact hours, language — if other than German)		
S + S (no information on SWS (weekly contact hours) and course language available)		
<b>Method of assessment</b> (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
a) written examination (approx. 60 minutes) or b) term paper (approx. 12 pages) or c) presentation (approx. 25 minutes) and handout (approx. 2 pages) or d) presentation (approx. 20 minutes) with written elaboration (approx. 6 pages) or e) oral examination of one candidate each (approx. 15 minutes) or f) oral examination in groups (groups of 4, approx. 15 minutes per candidate) Language of assessment: German, English
