Contents		
Theoretical principles of physiological speech development in the fields of semantics/vocabulary, phonetics/phonology, syntax/morphology. Principles of aetiology, phenomenology, diagnostics and therapy planning for specific speech development disorders. Principles of planning and documenting an ICF-oriented therapy. Practical exercises in analysing findings and planning therapy in a theoretical manner.		
Intended learning outcomes		
Professional competence: The students have knowledge of physiological speech development as well as theoretical principles of aetiology, phenomenology, diagnostics and therapy planning for specific speech development disorders. Implementation competence: The students are able to differentiate between normal and anomalous physiological speech development. The students are able to identify the key areas of disorders and to plan appropriate therapy. Social-communicative competence: The students succeed in giving a differentiated description of linguistic skills and anomalies in children. Personal competence: The students show self-confidence based on their professional knowledge of speech development disorders. Their self-confidence enables the students to further develop their therapeutic personality. Reflection competence: The students understand that the evaluation of own competencies is the foundation of an ICF-based therapy.
