

Module title		Abbreviation
Theory and practice of speech and language disorders: basics and diagnostic of neurogenic speech and language disorders		o6-SH-LogTheoZNS-152-mo1
Module coordinator		Module offered by
holder of the Chair of Special Education III		Chair of Special Education III: Speech and Language Pathology
ECTS	Method of grading	Only after succ. compl. of module(s)
5	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	undergraduate	--
Contents		
<p>Theoretical principles and in-depth study of causes, symptomatology and classification of aphasia, apraxia of speech and dysarthrophonia in due consideration of neurological, anatomical, functional and linguistic aspects, differentiation of other communicative and vocal impairments, differentiation of medical and psychosocial criteria of prognosis, knowledge of the effects of common concomitant disorders and the importance of interdisciplinary work for diagnostics, organisation, contents and carrying out of an ICF-oriented anamnesis of the afore-mentioned clinical pictures, organisation, contents and evaluation criteria of common standardised diagnostic methods for the afore-mentioned clinical pictures, methods of selecting, planning, executing, evaluating and interpreting diagnostic methods, documentation of findings, formulation of a logopaedic report and diagnosis including ICF-oriented therapy goals, practical exercises in the fields of anamnesis and diagnostics.</p>		
Intended learning outcomes		
<p>Professional competence: The students are able to describe the theoretical principles of the causes, symptomatology and classification of aphasia, verbal apraxia and dysarthrophonia whilst taking into account neurological, anatomical, functional and linguistic aspects. Implementation competence: They are able to plan, conduct, evaluate and document disorder-specific diagnostics. The students know the basics of planning and documenting an ICF-oriented therapy. Social-communicative competence: They know the principles of conversation techniques for a target-oriented anamnesis. Personal competence: The students should have and advance basic therapeutic competencies. Reflection competence: The students individually learn to evaluate their own diagnostic competencies.</p>		
Courses (type, number of weekly contact hours, language – if other than German)		
S (3) + S (4)		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
<p>written examination (approx. 60 minutes) or term paper (approx. 12 pages) or presentation (approx. 20 minutes) with written elaboration (approx. 6 pages) or oral examination of one candidate each (approx. 15 minutes) Language of assessment: German and/or English</p>
