<p>In this module, we study different therapeutic approaches and methods in the fields of semantics/vocabulary, phonetics/phonology and syntax/morphology. Based on this knowledge, we develop a hierarchical method of reaching ICF-oriented therapy goals. Furthermore, we select patient-oriented as well as disorder-specific therapy methods and conduct practical exercises to develop a patient-oriented therapy on different linguistic levels.</p>		
Intended learning outcomes		
<p>Professional competence: The students reasonably select therapeutic methods according to the corresponding linguistic level. They plan an ICF-oriented therapy whilst taking into account patient-oriented goal setting. Implementation competence: The students are able to employ different therapeutic methods in a patient-oriented manner. They know customisable ways of intervention that can be adjusted to the patient and his capabilities. Social-communicative competence: During therapy, the students adjust their verbal and non-verbal behaviour to the patient and disorder. Personal competence: The students know how to responsibly deal with themselves and their patients. They are encouraged to develop authentic behaviour. Reflection competence: The students analyse the effectiveness and execution of selected therapy methods. They are able to justify their therapeutic approach.</p>
