### Contents
Subject and purpose of science and criteria of scientificity. Scientific methods and systems, central and selected scientific-theoretical positions and methods of knowledge acquisition (including: empirical-analytical approaches, critical rationalism, phenomenology, hermeneutics, critical theory, constructivism and systems theory). Principles of scientific work on the basis of specific problems and questions of empirical research and practice. Evidence-based research in the field of speech therapy

### Intended learning outcomes
Professional competence/methodological competence/implementation competence: The students are able to examine special educational problems in view of different scientific positions and perspectives. By applying different learning techniques, the students advance their knowledge of scientific theory and learn to conduct systematic and methodological research; they are able to independently conduct and evaluate small scientific projects, especially in the field of speech and language therapy. Social competence: The students have advanced their basic knowledge of scientific theory on their own or in small groups.
