Contents		
<p>The third module focusses on a specific theoretical perspective on the elaboration of special educational phenomena and tasks. This perspective is discussed in detail. This (for example scientific-theoretical school) is supposed to serve as a matrix for the structuring of scientific-theoretical questions and for the development of concepts. (Alternatively, a specialisation in another content area than in "Metatheories and Interdisciplinary Contexts 1" and "Metatheories and Interdisciplinary Contexts 2" is possible in the module "Metatheories and Interdisciplinary Contexts 3". In this case, the contents and competencies/qualifications which have to be acquired correspond to the ones described in "Metatheories and Interdisciplinary Contexts 1".)</p>		
Intended learning outcomes		
<p>The students are able to consistently represent and understand a point a view / theory. They have advanced knowledge of humanistic curricula, including a wider pedagogical context.</p>
