Contents		
<p>In this course we study basic contents, questions and issues of the didactic fields "creating movement", "playing with and against each other" and "promoting health" by evaluating our own practical experiences. We specify these fields by studying central aspects of the integration of movement-oriented topics into school life. We playfully examine the promotion of fitness and coordination in the individual fields. In this context, we discuss aspects of organisation and safety and find differentiation possibilities specific to individual types of school. We use examples from motoric plays and small games with and without a ball to experience and evaluate basic principles, problems and possibilities of playing with and against each other. The module components "Creating Movement" and "Playing with and Against Each Other" each contain specific aspects of "Promoting Health".</p>		
Intended learning outcomes		
<p>The students have basic competencies in the three didactic fields "creating movement", "playing with and against each other" and "promoting health". They know the basic, school-type-specific criteria of planning, conducting and evaluating teaching/learning processes in physical education classes. The students know teaching/learning concepts to support the development of coordination and stamina in class. They are able to apply various organisation forms and differentiation possibilities of the integration of movement-oriented topics into school life. Furthermore, they know how to integrate knowledge about health maintenance and health promotion in the context of sports activities and human movement.</p>
