Contents		
This module includes ecological aspects and historico-cultural backgrounds of movement and sports. We use innovative movement fields and informal learning situations (including a winter/summer sports week) to test self-determined and experience-based learning. The students acquire a first-hand understanding of the backgrounds and topics of recreational sports and trend sports in view of movement science.		
Intended learning outcomes		
The students have essential professional skills in identifying, understanding, classifying and evaluating concepts of experience-based pedagogy. They know facets of (youth-)cultural movement practice and are able to evaluate the importance of self-determined movement for their own movement career. Furthermore, they know basic connections between trend and recreational sports and super-ordinated education goals (esp. safety and environmental education) and are able to organise a well-conceived, movement-oriented project week. The students have professional and methodological competencies which enable them to monitor and support self-determined movement learning processes of children and juveniles.
