Contents			
During this module, the students extend their teaching/learning competencies in individual sports and movement fields for individuals. They use examples from exercising with equipment/gymnastics, running, jumping, throwing/athletics, exercising in water/swimming and from the creation of movement/gymnastics/dance to broaden their movement and perception competencies as well as their method and evaluation competencies. They focus on teaching in an increasingly differentiated, varied manner (education to and through sports) in homogeneous and heterogeneous settings for teams of an increasing learning level. The students test and evaluate their knowledge about sport didactics in practice in accordance with differentiated guidelines regarding performance and teaching.			
Intended learning outcomes			
The students have advanced movement, perception, method and evaluation competencies in different exercise settings and individual sports and are able to adjust them to individual learning requirements. They have advanced subject-didactic, pedagogical and motor competencies in gymnastics, swimming, athletics and dance and are able to apply exemplary teaching/learning competencies to various exercise settings whilst taking into account different learning levels and goals (education to and through sports).
