<b>Contents</b>		
<p>In this module the students improve, advance and extend their teaching/learning competencies in various types of sports. They extend their movement and perception competencies as well as their method and evaluation competencies in the exemplary fields of running, jumping, throwing/athletics and creating movement/gymnastics/dance and examine their possible contribution to health promotion. They focus on teaching in an increasingly differentiated, varied manner (education to and through sports) in homogeneous and heterogeneous settings for teams of an increasing learning level. In doing so, they learn about exemplary connections to superordinated education goals (e.g. aesthetic education, health promotion). The students test and evaluate their knowledge about sport didactics in practice in accordance with differentiated guidelines regarding performance and teaching.</p>		
<b>Intended learning outcomes</b>		
<p>The students have advanced movement, perception, method and evaluation competencies in different exercise settings and are able to adjust them to individual learning requirements. They have advanced subject-didactic, pedagogical and motor competencies in athletics and gymnastics/dance. The students are able to encourage and apply varied processes of physical expression and movement creation. Furthermore, they are able to apply exemplary teaching/learning competencies to varied exercise settings whilst taking into account different learning levels and goals (education to and through sports, esp. health promotion and aesthetic education).</p>
