Contents

This module provides an introduction to physical education as a teaching subject. The students acquire knowledge about the specific work techniques of this subject on the basis of individual education models, teaching examples and class projects in different grades. The students broaden, systematize and complement their practical experiences by learning about technical and didactic aspects in the courses that accompany the teaching placements. For this purpose, they study selected areas of physical education classes which confirm to the guidelines of legal directives and the curriculum. They will focus on different topics, including the current development of teaching practice. In this context they also find connections to sports education and movement science which support the successful introduction of didactic concepts into class.

Intended learning outcomes

The students are able to prepare, conduct and evaluate physical education classes on the basis of predetermined criteria. They know how the didactic problem of choosing topics impacts the reality of classes and how to find solutions. They know how to implement the Bavarian curriculum in classes of different grades while keeping a critical eye on the current knowledge and debate about sport didactics. Furthermore, they are able to critically evaluate the latest developments of the educational system.
