Contents
In this module, in-depth knowledge of methods of qualitative research will be practiced. These methods will be relevant for the empirical exploration of topics concerning sustainability. Possible topics include: how can the consequences of non-sustainable politics (e.g. the consequences of global social inequality, environmental risks, experiences of migration) or the effects of global critical publics be analyzed from an empirical sociological point of view?

Intended learning outcomes
The student has acquired the ability to understand and critically assess topics and problems in qualitative methods. Students will get a broad survey of essential qualitative methods of sustainability-research that can be built upon an amplified in subsequent modules.
