<b>Contents</b>		
Overview of key and special phenomena of behavioural abnormalities; discussion of selected phenomena regarding manifestations, diagnostics and differential diagnostics, explanatory approaches (also: complexity of influencing factors) and especially regarding starting points, guidelines and concepts of pedagogical, therapeutic-pedagogical, psychosocial and psychotherapeutic prevention and intervention; overview of relevant support concepts in view of behavioural abnormalities; overview of the institutions relevant to Education for People with Emotional and Behavioural Disorders.		
<b>Intended learning outcomes</b>		
The examination of phenomena and their backgrounds promotes the students' professional competence: They are able to recognize and evaluate problems in the context of behavioural disorders. At the same time, their methodological competencies are fostered: They can choose approaches and concepts according to practical problems and institutional contexts. In the practical parts of the module, the students advance their social competence of problem solving. They further develop self-competence by gaining confidence in dealing with behavioural abnormalities in pedagogical contexts and by increasing the ability to judge their own possibilities and limits in this area.
