## Module coordinator

holder of the Chair of Plant Physiology and Biophysics

## Module offered by

Faculty of Biology

## ECTS

4

## Method of grading

Numerical grade

## Only after succ. compl. of module(s)

--

## Duration

1 semester

## Module level

Undergraduate

## Other prerequisites

Admission prerequisite to assessment: regular attendance of exercises and successful completion of the respective exercises as specified at the beginning of the course.

## Contents

[Version 1: This module will discuss the cell, the smallest unit of life, starting with its macroscopic structure before moving on to its microscopic structure. It will point out differences and similarities between prokaryotic cells (bacteria, archaea) and eukaryotic cells (animals, plants).] [Version 2: The first part of the module will acquaint students with the elementary building blocks of life as well as biological categories. Building on this knowledge, the course will then discuss the cell, the smallest unit of life, starting with its macroscopic structure before moving on to its microscopic structure. It will point out differences and similarities between prokaryotic cells (bacteria, archaea) and eukaryotic cells (animals, plants).]

## Intended learning outcomes

Knowledge of the structures of prokaryotic and eukaryotic cells and their (biological) macromolecules. Knowledge of the specific characteristics of the intracellular and extracellular structures of prokaryotes as well as animal and plant cells. Familiarity with the components and functioning of microscopes.

## Courses

V + Ü (no information on SWS (weekly contact hours) and course language available)

## Method of assessment

Written examination (60 minutes)

## Allocation of places

--

## Additional information

--

## Referred to in LPO I

(examination regulations for teaching-degree programmes)

--
