### Contents

In this module, students will acquire advanced knowledge and skills in techniques of molecular biology for questions of plant physiology. Every student will perform a physiological experiment that will be analysed using the methods the students have learned. Current scientific publications in the field of plant physiology will be presented and discussed in English.

### Intended learning outcomes

Students are able to perform advanced experiments in plant physiology as well as to interpret and deliver presentations on scientific publications.

### Courses

This module comprises 2 module components. Information on courses will be listed separately for each module component.

- 07-5S2PS2-1MP-092: Ü (no information on SWS (weekly contact hours) and course language available)
- 07-5S2PS2-2MP-092: S (no information on SWS (weekly contact hours) and course language available)

### Method of assessment

Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.

**Assessment in module component 07-5S2PS2-1MP-092: Molecular Biology of plants (laboratory course)**

- 9 ECTS, Method of grading: numerical grade
- a) written examination (approx. 60 minutes) or b) log (approx. 10 to 20 pages) or c) oral examination of one candidate each (approx. 30 minutes) or d) oral examination in groups (groups of 2 or 3 candidates, approx. 60 minutes) or e) presentation (approx. 20 to 30 minutes)
- Language of assessment: German or English

**Assessment in module component 07-5S2PS2-2MP-092: Molecular Biology of plants - Progress in plant physiology (seminar)**

- 1 ECTS, Method of grading: (not) successfully completed
- presentation (approx. 20 to 30 minutes)
