| In this module, students will acquire insights into topics, approaches and methods in special animal ecology. Students will also be involved in current research projects.   |                          |   |
| <b>Intended learning outcomes</b>  |                          |   |
| Students are proficient in the theory and practice of research in the field of special animal ecology. They are able to analyse their own research findings, to present these as well as to discuss these in the context of current publications.  |                          |   |
