<b>Contents</b>		
Using the examples of topics in contemporary research, students will be introduced to the concepts of good scientific practice, including planning research strategies, performing complex experiments as well as documenting and communicating research findings in the form of a presentation, a publication or a term paper. Students will be involved in ongoing research and will learn how to independently apply specific methods in pharmaceutical biology with a focus on molecular biochemistry.		
<b>Intended learning outcomes</b>		
Students are able to independently pursue research projects in the field of pharmaceutical biology with a focus on molecular biochemistry. They are able to independently address and document questions in the field of plant biology, adhering to the principles of good scientific practice.
