**Contents**

This module will provide students with an overview of biology experiments that are performed in a teach’n’learn lab. Having gained an overview of traditional and modern methods in biology, participants will learn to incorporate these into school-specific experiments. Students will prepare classroom and lab sessions, will be trained in important techniques for measuring how effective a session was and will practise teaching these sessions to pupils in the practice centre.

**Intended learning outcomes**

Knowledge of methods in biology. Ability to forge and maintain links with out-of-classroom learning environments. Ability to prepare sessions in a teach’n’learn lab and perform the respective follow-up work. Insight into how sessions in the teach’n’learn lab may raise the pupils’ level of motivation and interest in biology in general and current topics in biology in particular. Knowledge of how out-of-classroom sessions in the teach’n’learn lab may be incorporated into biology lessons in Grundschule. Overview of methods for evaluating the cognitive learning achievement of pupils.

**Courses** (type, number of weekly contact hours, language — if other than German)

S + Ü (no information on SWS (weekly contact hours) and course language available)

**Method of assessment** (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

seminar paper (7 to 10 pages)

**Allocation of places**

--

**Additional information**
